## **Science Policy**

**September 2016 – Review September 2019**

### **Introduction**

This policy outlines the teaching, organisation and management of science taught at Lewknor Church of England Primary School. The school's policy for science is based on the new primary curriculum which is statutory from September 2014. The implementation of this policy is the responsibility of all teaching staff.

### **Teaching Science**

At Lewknor we believe that the best science teaching fosters and develops pupils' curiosity in the subject whilst also helping them to fulfil their potential. For our pupils to achieve well in science, they need to acquire the necessary scientific knowledge and also be able to enjoy the experience of engaging in purposeful scientific enquiry in order to help them to answer scientific questions about the world around them.

The new National Curriculum 2014 states why we teach science in schools:

*'A high-quality science education provides the foundations for understanding the world through the specific disciplines of biology, chemistry and physics...Through building up a body of key foundational knowledge and concepts, pupils should be encouraged to recognise the power of rational explanation and develop a sense of excitement and curiosity about natural phenomena.'*

### **Aims**

Through high-quality science teaching, we aim to help our pupils understand how major scientific ideas have played a vital role in society. Moreover, we aim to prepare our pupils for life in an increasingly scientific and technological world.

We aim to do this by:

- Delivering high quality, interesting and engaging science lessons;
- Using scientific contexts to develop and consolidate cross curricular skills in literacy, maths and ICT;
- Teaching science in a global and historical context; including the contributions of significant scientists from a range of cultures;
- Developing and extending pupils' scientific knowledge and understanding;
- Developing pupils' ability to work scientifically and involve pupils in planning, carrying out and evaluating investigations;
- Developing pupils' scientific vocabulary and ability to articulate scientific concepts clearly and precisely;
- Ensuring that all pupils are appropriately challenged to make good progress in science.

### **Teaching and Learning**

At Lewknor, teachers plan and deliver high-quality and engaging science lessons incorporating a range of teaching and learning styles. Teachers will provide opportunities for pupils to:

- Learn about science, where possible, through first-hand practical experiences;
- Develop their research skills through the appropriate use of secondary sources;
- Work collaboratively in pairs, groups and/or individually;
- Plan and carry out investigations with an increasing systematic approach as they progress through the school;
- Develop their questioning, predicting, observing, measuring and interpreting skills;
- Record their work in a variety of ways e.g. writing, diagrams, graphs, tables;
- Read and spell scientific vocabulary appropriate for their age;
- Be motivated and inspired by engaging and interactive science displays which include key vocabulary and relevant questions;
- Learn about science using the outdoor learning environment.

### **Planning**

- Science in the Early Years Foundation Stage is planned using the Early Years Curriculum 'Understanding of the World'.
- Key Stage 1 and 2 teachers plan science lessons using the new National Curriculum (2014).
- All science lessons have focussed learning objectives, clear differentiation and success criteria to ensure that pupils make at least good progress.
- 'Working scientifically' is embedded throughout the areas of learning in key stage 1 and 2; this focuses on the key aspects of scientific enquiry which enable pupils to investigate and answer scientific questions.
- Areas of learning within key stage 1 and 2 ensure that statutory requirements are being covered through the specific disciplines of biology, chemistry and physics (teachers may also refer to the non-statutory guidance which provide additional support).
- Please refer to the long term plan for details of the specific areas of learning covered in each year group over the year.

### **Assessment**

- At present key stage 1 and 2 use teacher assessment and pupil assessment in the form of a targets sheet in the front of the children's books. This includes assessment at the start of each topic and end of each topic.
- Teachers use effective Assessment for Learning (AfL) strategies which are used to inform their planning and teaching.
- Teachers provide quality feedback to pupils (verbal or written) which clearly identifies how they might need to improve.
- At present, class teachers provide an annual teacher assessment result and pupils' progress is tracked against the National Curriculum levels for Key Stage 1 and 2. This system will be reviewed in light of the changes brought about by the new curriculum in the summer term 2016. (A proposal to incorporate termly science assessment tests is currently being reviewed with an aim to introduce these from year 1 to year 6 commencing September 2016.)
- In EYFS, Lewknor School assesses science against the 'Development Matters' statements in the 'Understanding of the world' area of the Early Years Curriculum. The statements go from birth through to the Early Learning Goals at the end of Reception.

### **Monitoring**

- Scrutiny of work will be carried out by the class teachers during staff meetings and informal discussions will be held between colleagues. The science coordinator will then provide verbal and written feedback.

### **Health and safety**

- Teachers plan safe activities for science and complete a risk assessment if necessary.

- Teachers and teaching assistants are aware of health and safety procedures when using equipment/food in science lessons.
- Teachers ensure pupils are aware of the need for personal safety and the safety of others during science lessons.

### **Resources**

- Science resources are stored in the Upper Junior's classroom.
- The science coordinator will carry out an audit of the science resources and ensure an inventory is kept on the shared drive and updated when new resources are ordered.
- The subject coordinator will be informed of any changes regarding science resources i.e missing or broken resources and/or when new or replacement resources are required.

### **Inclusion**

- At Lewknor, teachers ensure that they adopt an inclusive approach to their science planning and teaching; ensuring that pupils of all abilities and backgrounds have an equal opportunity to make good progress and enjoy science.
